

Daily Log

Sunday February 2

Compiled Together Mid-Year Presentation and Wrote a Script. Realized Small Indexing Error in Parsing of Text and Quickly Fixed this Issue.

Saturday February 8

Looked into IBM Watson Speech to Text API and Possible Punctuation Parameters/Solutions within the API. Could not Find any Potential Fixes with this API.

Timeline

Date	Goal	Met
Jan 24	Be Able to Summarize the Obama Speech in Less than 4 Sentences	Yes, Summarized the Obama Speech in 2 - 4 Sentences
Jan 31	Research into Audio to Text Methods that Can Account for Punctuation	No, Did not Have Class due to AMC 12
Feb 7	Research into Audio to Text Methods that Can Account for Punctuation	No, Did not Have Time due to Presentations
Feb 14	In India This Week, will Continue Work Next Week	
Feb 21	Research into Audio to Text Methods that Can Account for Punctuation	

Reflection

I did not have much time these two weeks to get much work done due to the AMC 12, sick days, and presentations. However, I was able to look into the IBM Watson Speech to Text API near the end of the two weeks, but could not find a fix for the punctuation issue. I will leave to India next Wednesday and will come back the following Wednesday, so I will not be able to complete much work the next two weeks too. However, after this, I hope to be able to dedicate around three weeks to find a fix for my punctuation issue.
